Why Revital

People Who Be Suitable for Using:

Cardiopulmonary patients

Oxygen uptake could suspend illness to get worse, improve immune competence of pneogaster and our body. And can alleviate or remit shortness of breath, to make you are refreshing and active and improve quality of life. Keep long time oxygen therapy, it will be important in recovering of disease absolutely.

Old and aged people: help to be vigorous and defer senility

Old man's vital capacity goes downhill quickly; some vitals such as heart, brain, kidney and liver will be gradually decline. Oxygen uptake would make up oxygenic shortage that caused by physical function decline and keep every organ in good condition, also prevent disease to keep healthy and defer senility.

Pregnant woman

Oxygen uptake can help fetus get more oxygen in order to grow up healthily and become an "Oxygen Baby", to have inherent advantages during the pregnant time.

Students: It will help and improve study

Our brain will use and take out 25% oxygen of whole body. When you study long time, you need oxygen uptake in time and could help you improve ability of memory and study.

Health, comes from accumulation bit by bit.
